Professional Summary

Engineer with experience developing AI-powered enterprise solutions, backend systems, and technology consulting solutions across PwC, CRIS, and student consulting engagements. Skilled in Java, Spring Boot, SAP Commerce, and Generative AI, with a track record of building scalable products and translating business requirements into practical technical solutions. Proven ability to combine technical depth with strategic thinking, leadership, and effective communication.

Skills

Programming Java, SQL, C, HTML, CSS, JavaScript	Backend & APIs Spring Boot, REST APIs, SAP Commerce Cloud
AI & Automation Azure AI, Gemini API, Prompt Engineering	Frontend & CMS Webflow, Wordpress
Databases PostgreSQL, Cassandra	Developer Tools Git, GitHub, Docker, Maven, Gradle, Bruno, Postman, Pandoc
Cloud & Infrastructure Cloudflare Pages, nginx	Enterprise Tools Jira, Twilio
Analytics Excel, Power BI, R Studio	Languages English (Fluent), Hindi (Fluent), Spanish (A2 CEFR)

Professional Experience

Intern (SAP Commerce Team) PwC India - Built a proof-of-concept Dealer Management System (DMS) for Aditya Birla Group as a WhatsApp bot by integrating SAP Commerce APIs for product discovery, cart management, order placement, service ticketing, account management, and order tracking. - Developed the backend using Java, Spring Boot, and SAP Commerce, reusing enterprise REST APIs to provide a seamless dealer experience across web and WhatsApp platforms. - Designed an AI-powered prototype using Gemini to translate natural-language requests into backend API calls, demonstrating an alternative conversational interface.	Jul 2025 – Dec 2025
--	---------------------

- Developed an internal AI-powered assistant that generated **test cases, UAT scripts, Jira user stories, and technical design documents** using Gemini, prompt engineering, and Pandoc, reducing manual documentation effort and standardizing deliverables.
- Built a web interface for the testing assistant and authored technical documentation supporting system usage, maintenance, and future enhancements.

Summer Intern

May 2024 – Jul 2024

Centre for Railway Information Systems (CRIS)

- Developed a Spring Boot application to migrate Passenger Reservation System (PRS) data from **PostgreSQL** to **Apache Cassandra** as part of an enterprise database modernization initiative.
- Designed and implemented a data migration pipeline mapping relational database structures to corresponding NoSQL models.
- Built migration logic in Java using enterprise database schemas and data models provided by the engineering team.

Consulting Experience

Senior Consultant

Jul 2023 – Feb 2024

180 Degrees Consulting, BITS Goa Chapter

SRUGenie Technologies

- Developed commercialization recommendations for an antimicrobial nanotechnology startup by evaluating product opportunities across **B2B, B2C, and D2C** markets.
- Conducted regulatory research on **CDSO** and **U.S. FDA** guidelines for nanoparticle-based products to assess domestic and international compliance requirements.
- Designed user personas, buyer journeys, and key messaging while contributing to product portfolio diversification and go-to-market strategy recommendations.

One Acre Fund

- Evaluated **5 impact investment organizations** supporting African SMEs and smallholder farmers by analyzing investment strategies, funding criteria, KPIs, and **UN Sustainable Development Goal (SDG)** alignment.
- Researched annual reports, financial statements, specialized investment databases, and news archives to support a comparative assessment of **20+ organizations**.
- Contributed to the development of a structured evaluation framework for benchmarking impact investment organizations.

Leadership Experience

Head of Operations

Aug 2024 – Apr 2025

Do Well Do Good Future Leaders – BITS Goa Chapter

- Led operations for the BITS Goa chapter of an international student consulting initiative, coordinating training programs for **70+ students**.

- Delivered workshops on consulting frameworks, business storytelling, guesstimates, presentation design, and sustainable business principles.
- Established the chapter's official Instagram presence and introduced a structured educational content initiative.

Primary Instructor
Center for Technical Education (BITS Goa)

Sep 2024 – Dec 2024

- Designed and delivered a **6-week consulting curriculum** for **50 students**, covering AI in consulting, case interviews, structured problem solving, and presentation design.
- Developed industry-oriented course material using practical consulting cases and personal experience.
- Mentored students exploring consulting careers beyond traditional engineering pathways.

Community Lead
BITS Goa Blockchain Club

Oct 2023 – Aug 2024

- Revived the club's community engagement through educational events and speaker sessions featuring industry professionals.
- Coordinated collaborations with student organizations to promote blockchain and Web3 awareness across campus.

Head of Funding & Outreach
AlChEMISTa - BITS Goa

Oct 2023 – Aug 2024

- Coordinated with faculty to secure resources and operational support for departmental initiatives and events.
- Managed funding and operations for activities during the institute's **20th Anniversary Open Day**, supporting large-scale student engagement.

Education

Birla Institute of Technology and Science (BITS Pilani), K.K. Birla Goa Campus
B.E. (Hons.) Electrical & Electronics Engineering | 2022 – 2026
CGPA: 7.18
